DATASHEET

Founders Mode

Run your company through AI seats that each own an area, with a daily brief and every approval in one place.

STATUS **Demo on request**

Who it's for	Founders running more than they have hands for
Part of	The Premier Choice Intelligence platform: machines, agents, verification, approvals and the living record

What it is

Founders Mode lets a founder run the company through AI seats that each own an area of the business, with a daily brief and approvals in one place.

Each seat is an AI agent with a clear area and a clear definition of done. The work is checked by a second party, and anything that speaks for you, spends money or can't be undone waits for your yes. You spend your time on decisions instead of on passing messages between people and tools.

Who it's for

- Solo founders and small leadership teams running several areas at once.
- Founders with more than one business or department who need one view of all of them.
- Owners who want to work on the business, not only in it.

Key capabilities

Seats that own an area

Each AI seat owns one area of the business, with written duties and a definition of done.

Daily brief

One brief each day: state of affairs, what changed and what needs you.

Approvals in one place

Messages, spending and anything that can't be undone wait in one queue for your yes.

Verified work

A seat's work counts as done only when a second party confirms it against the record.

Living record

Every seat writes to the Living Book, so any seat can catch up by reading it.

You stay in charge

Seats propose and do the work. You decide what speaks for the company.

How it works

1. **Map your areas**
   We list the areas of your business and what done looks like in each.
2. **Assign seats**
   Each area gets an AI seat with written duties, checks and limits.
3. **Turn repeat work into machines**
   Work a seat does again and again becomes a scheduled machine.
4. **Read your daily brief**
   See what moved, what was verified and what is waiting on you.
5. **Approve and move on**
   Say yes, adjust or say no, in one place.

Built and tested in our own companies

We run the Premier Choice companies this way today: one founder, with a team of AI agents doing the operating work, a daily brief and approvals in one place. Founders Mode is that setup, offered to other founders.

Request a demo

Status: Demo on request. Request a demo and we will walk you through Founders Mode as we run it ourselves.
